

Solutions for today.
Benefits for generations.

BioHub Algone

Where science meets sustainability, and your farm's potential meets our passion.

BioHub Algone

BioHub Algone Is a dual use product for wastewater and pond applications. This Is a 5 billion count functional blend for degradation of organic sediment in ponds, lakes, and open waters. In wastewater plants and ponds, also effective in augmenting biological oxygen demand (BOD) reduction.

Benefits

When utilised as part of our integrated water quality solution, BioHub Algone can provide the following benefits to water quality in ponds, lakes, and open waters.

Augments natural degradation.

Reduces and eliminates muck build-up.

Helps to reduce odours associated with decaying organics and solid waste.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
