

Solutions for today.
Benefits for generations.

BioHub B4-S

Where science meets sustainability, and your farm's potential meets our passion.

BioHub B4-S

BioHub B4-S is a premium 4 Bacillus soluble biological ameliorant. The strains selected provide an excellent blend for nutrient sequestration, soil amelioration, and a primary application for a targeted biological solution. BioHub B4-S provides an excellent solution for the soil, crop, and input efficiency challenges in Australian agriculture. BioHub B4-S contains the following biology.

- Streptomyces badius
- Bacillus pumilus
- Bacillus licheniformis
- Pseudomonas fluorescens

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub B4TF can provide the following benefits to the soil and crops.

Solubilisation of nutrients such as phosphorus and trace elements.

Improved root structure development and uptake of water nutrients.

Contains nitrogen fixing microbes to improve soil nitrogen use efficiency.

Mitigation of salt stress in some plants.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
