

Solutions for today.
Benefits for generations.

BioHub BioFeed

Where science meets sustainability, and your farm's potential meets our passion.

BioHub BioFeed

BioHub BioFeed is a liquid biostimulant that has been designed as a high quality food source for the entire BioHub biology range. BioHub BioFeed contains a concentrated blend of.

- Organic compounds which contain amino acids, vitamins, and minerals which act as an important constituent for biology growth.
- The American Leonardite utilised in BioHub BioFeed is one of the oldest known sources of Leonardite and has been the benchmark for quality humic sources for decades.

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub BioFeed can provide the following benefits to the soil and crops.

Being sourced from American Leonardite, the activity is **5 times** stronger than other humic matter

Improved root structure development when utilised with targeted biology.

Excellent food source for biology and assists with nitrogen buffering in soil.

Improves physical and nutrient characteristics of the soil when utilised with targeted biology.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
