

Solutions for today.
Benefits for generations.

BioHub Energise-P

Where science meets sustainability, and your farm's potential meets our passion.

BioHub Energise-P

BioHub Energise-P is a proprietary blend of concentrated polyphosphate, organic catalysts, and an activated carbon. It provides an excellent replacement for traditional granular and soluble phosphorus options for soils with availability challenges.

BioHub Energise-P can also be utilised as an effective foliar product for targeted phosphorus applications in a variety of crops.

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub Energise-P can provide the following benefits to the soil and crops.

Provides an available form of phosphorus in nutrient challenged soils.

Improves germination and root development.

Additives improve phosphorus uptake and movement in soil profile.

Can be applied as a foliar, irrigated, and direct injection with seed.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
