

Solutions for today.
Benefits for generations.

BioHub LaB

Where science meets sustainability, and your farm's potential meets our passion.

BioHub LaB

BioHub LaB is a premium effective microbe product. It is a market breakthrough being the **ONLY** soluble Lactobacillus product available in agriculture. Each 500g pack produces 500L when combined with **BioHub LaBFeed**. In sub-optimal conditions, normal liquid Lactobacillus products can decrease their viability in a few days to weeks. However, BioHub LaB ensures fresh product EVERY application. It also has a market leading biology count of 110 million cfu/g when tested in real world production scenarios. BioHub LaB includes the following biology

- Lactobacillus delbrueckii
- Lactobacillus casei
- Enterococcus faecalis

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub LaB can provide the following benefits to the soil and crops.

Is simple to mix by the grower. Thus ensuring that living biology is applied EVERY time.

BioHub LaB has multiple benefits for soil and plant health. Including salt mitigation and nutrient solubilisation.

Industry leading biology counts means that rates of BioHub LaB are much lower than competitors.

You only make up what you need for each application. Ensures maximum coverage and reduces wastage.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
