

Solutions for today.
Benefits for generations.

BioHub LaBFeed

Where science meets sustainability, and your farm's potential meets our passion.

BioHub LaBFeed

BioHub LaBFeed is a liquid biostimulant that has been designed specifically as a high quality food source for the BioHub LaB. This ensures maximum biology numbers with every fresh batch made. BioHub LaBFeed contains a concentrated blend of organic compounds which contain amino acids, vitamins, and minerals which act as an important constituent for biology growth.

6 Simple Mixing Steps

- 1 Determine application rate and fill suitable container with amount of water required. Application rates range from 5-10L per hectare.
- 2 If not utilising rainwater place supplied tablet into container to assist in alleviating some contaminants. 1 tablet per 250 litres
- 3 Warm water (25-28 degrees) provides the best results for biology. Leave out in the sun during the day to warm water if cold.
- 4 Apply BioHub LaBFeed at a rate of 12L per 100L of water. Apply BioHub LaB at a rate of 100g per 100L of water.
- 5 Mix thoroughly and allow blend to sit for approximately 1 hour for biology to replicate. Ensure that this is done out of direct sunlight.
- 6 Apply the blend within 2-3 days of completion for maximum benefit. Unused BioHub LaB can be resealed and placed in refrigerator for later use.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
