

Solutions for today.  
Benefits for generations.

# BioHub Rebound

Where science meets sustainability, and your farm's potential meets our passion.

# BioHub Rebound

BioHub Rebound is proprietary blend of organic compounds and biostimulants. It is designed to aid in the recovery from stress events such as frost, excessive heat, and operational damage. Utilised in crops, turf, and pastures. BioHub Rebound contains a concentrated blend of organic compounds and bull/knot kelps. Some of the common nutrients include.

- Macronutrients.
- Micronutrients.
- Plant growth regulators.
- Other compounds such as amino acids, polysaccharides, antioxidants, and other bioactive compounds: These components contribute to overall plant health, resilience, and stress tolerance.

## Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub Rebound can provide the following benefits to the soil and crops.

Improves plant responses to environmental stresses such as heat and frost.

Improves key growth parameters such as cell division and root development.

Improves plant recovery from mechanical stress events such as sporting events.

Improves nutrient transport, storage, and remobilisation in the plant.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
