

Solutions for today.
Benefits for generations.

BioHub T3-S

Where science meets sustainability, and your farm's potential meets our passion.

BioHub T3-S

BioHub T3-S is a premium 3 Trichoderma soluble biological ameliorant. The strains selected provide an excellent blend for nutrient sequestration, soil amelioration, and direct plant health attributes. BioHub T3-S contains the following biology.

- Trichoderma Atrobrunnem
- Trichoderma Afraharzianum
- Trichoderma Harzianum

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub B4TF can provide the following benefits to the soil and crops.

Solubilisation of nutrients and increase photosynthetic capability.

Improved root structure development and uptake of water nutrients.

Improved yields, crop quality, crop nutrient density, and margins.

Involved in the suppression of root and plant pathogens.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
