

Solutions for today.
Benefits for generations.

BioHub Unlock

Where science meets sustainability, and your farm's potential meets our passion.

BioHub Unlock

BioHub Unlock is proprietary blend of organic acids and organic compounds. It is designed to solubilise nutrients such as calcium, phosphorus, and potassium tied up in challenging soils. BioHub Unlock complements a strategy to improve uptake and reduce soil compaction over time. Some of the ingredients include.

- Organic acids
- Carboxylic acid
- Macronutrients.
- Other compounds such as amino acids, polysaccharides, and enzymes.

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub Rebound can provide the following benefits to the soil and crops.

Solubilises restricted nutrients in challenging soils.

Improves plant performance when utilised as part of an integrated solution.

Improves soil structure by reducing compaction over time.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
