**5kg**

## COMPATIBILITY

Product may be compatible with herbicides and pesticides. Please check with the manufacturer. Please be aware that physical compatibility does not guarantee product efficacy.

## APPLICATION GUIDE

Apply through boom spray, aerial, fertigation, or overhead irrigation. DO NOT apply when conditions are extremely hot. Best applied in temperatures in the range of 5 - 25 degrees Celsius. Preferably early in the morning or late in the afternoon.

## MIXING INSTRUCTIONS

1. Mix with non-chlorinated water if available.
2. Once the product is mixed in water, agitation is recommended.
3. To completely dissolve product, allow for approximately 30 minutes.
4. Fill the remainder of tank with water and maintain agitation.
5. Start application within 1 hour of final mixing. There may be some residue left over from fermentation.

## PRODUCT USAGE RATES

Please note that the product usage rates should only act as a general guide. BioHub Solutions Pty Ltd recommends that all products are applied after appropriate testing has been conducted so that correct products and rates can be recommended.

As a general rule BioHub B4-S should be applied at 200g/Ha at recommended application periods.

## CONDITIONS OF SALE

These goods are manufactured and tested to specific standards and are sold in good faith, however, no guarantee is given as conditions and methods under which they are used are beyond the control of BioHub Solutions Pty Ltd. Before using, user should determine the suitability of the product for his or her intended use and user assumes the risk and liability in connection therewith.
