- *Bacillus licheniformis*
- *Paenibacillus fluorescens*
- *Trichoderma longibrachiatum*
- *Trichoderma harzianum*
- *Trichoderma koningii*
- Fungi *Rhizopogon* sp

Benefits

When utilised as part of our integrated biological solution, called the BioPlan, BioHub B4TF can provide the following benefits to the soil and crops.

Solubilisation of nutrients such as calcium, phosphorus, and potassium.

Improved root structure, hyphae development and root biomass.

Improved yields, crop quality, crop nutrient density, and margins.

Improved pest and disease mitigation. Improved resistance to climatic extremes.

At BioHub Solutions, we fuse cutting-edge science and data with the wisdom of nature to deliver pioneering biological solutions to the agricultural sector. Our Australian heritage drives us to innovate for the unique challenges faced by local and global farmers, ensuring our products not only boost your bottom line but also safeguard the environment.

Take the guesswork out of biologicals by contacting one of our team or authorised business partners.
